

# GLOBAL PLAN TB DIAGNOSTICS PIPELINE

## Abbreviations

CRI: Colorimetric redox indicator assay  
 DST: Drug Susceptibility Test  
 LED: Light-emitting diode  
 LPA: Line probe assay  
 LTBI: Latent TB Infection  
 MODS: Microscopic observation drug-susceptibility  
 NAAT: Nucleic Acid Amplification Test  
 NRA: Nitrate reductase assay  
 POC: Point of Care

- \* Manual NAAT: technology for MTB Drug Susceptibility Testing
- \*\* Manual NAAT: technology for MTB detection at the Peripheral Lab
- \*\*\* Manual NAAT: technology for MTB detection at the Community Health Care Level

Technologies in boxes: endorsed by WHO
